Tashkent, Tashkent, Uzbekistan

Frontend course

– React JS, Redux.js

WORK EXPERIENCE

Frontend Developer

Digital One IT Company

09/2021 - Present

Tashkent, Tashkent, Uzbekistan

Digital One is an IT company based on A Logistic Company called Cargo Prime.

Achievements/Tasks

– During my work in this company, I participated in various projects, but since this company was financed by the Logistic company, our main work was the Cargo Prime project. The cargo-prime project originally used the ag-grid-table npm package. Since some features of ag-grid-table are paid, I was tasked to create a new table, and I did it successfully. Now this project uses the T able I made. After learning TypeScript, I want to post this table to npm.org. Also, the tasks that require high logic in this project are assigned to me by our team leader . I also used puppeteer.js and node.js to steal data from websites.

SKILLS

HTML

CSS

SASS

BOOTSTRAP

JAVASCRIPT

NODE.JS

EXPRESS.JS

MONGOOSE.JS

MONGODB

GIT

REACT.JS

REDUX.JS

MOMENT.JS

PUPPETEER.JS

ANT DESIGN

TYPESCRIPT

FREE TIME PROJECTS

1. Ant design clone (08/2021 - Present)

- We started this project with my teammates during my studies at Webbrain Academy under the leadership of our teacher Sardor Mukhtorov, and it is still going on together. We started this project inspired by the Ant Design UI library.
